

Subject: Introduction of New Infrastructure to Support Colocation Services

Notice to all Members,

Subject: Introduction of New Infrastructure to Support Colocation Services

Pursuant to the DGCX By-Laws, and Clearing Rules of the DCCC, all Members and relevant partners are hereby advised of the following.

DGCX makes available to Members and relevant partners Colocation services at its primary data center. As part of its ongoing investment in its services DGCX has recently upgraded its infrastructure, which now includes supporting 10Gig Fiber Cross Connect. This provides additional bandwidth and improved performance when accessing the market.

Members and relevant partners who wish to upgrade to the 10Gig Fiber Cross Connect service should contact DGCX by no later than close of business on **Monday 30 September 2019** (email address: support@dgcx.ae). The cost of this service will be a one-off installation fee of USD 3,000, with a monthly fee of USD 2,000 thereafter.

Members and relevant partners who choose to remain with the current 1Gig Copper Cross Connect service offering will be contacted separately by DGCX to arrange for the migration to the new infrastructure. This migration will result in the same service offering and hence there will be no charge incurred.

DGCX encourages Members and relevant partners to share this information with their technical staff as appropriate.

For further information with regard to this Notice, please contact DGCX Support.
